ABHIJEET SRIVASTAVA

SUMMARY

Lead Full Stack Engineer with experience in full stack development using Java, Spring Microservices, Angular, Reactjs, and AWS.

SKILLS

Full Stack Development ·

Software Architecture · Microservices ·

RESTful API · SQL · Java ·

Cloud-Native Development ·

DevOps Practices · JavaScript · Algorithms

Angular · React · SPA Development ·

Webpack · NPM · Spring Boot ·

Spring MVC · Hibernate · Kafka · JUnit ·

Mockito · Jest · SonarQube · Docker ·

Jenkins · Git · Scrum ·

Technical Leadership · Problem Solving ·

Code Review And Mentoring ·

System Design

KEY ACHIEVEMENTS

Successful react migration

Led AWS Serverless App Design

Enhanced User Engagement

Optimized Deployment Process

EDUCATION

B.Tech Electronics

Inderprastha Engineering College

2010 - 2014

LANGUAGES

English Advanced ●●●●●

Lead full stack engineer | Morgan Stanley | Ex-Deloitte

EXPERIENCE

P4 Director | Morgan stanley
04/2022 - Present

- Led the successful migration of an AngularJS application to ReactJS, leveraging a custom-built 'campfire' library
- Implemented the SEC 10b51 rule across a suite of interconnected applications within the ESPP system, ensuring regulatory compliance and minimizing risk.
- Automated batch job setup for new developers using shell scripting, significantly reducing onboarding time and streamlining the development workflow.

Consultant | Deloitte
01/2021 - 04/2022

- Developed and deployed a microservices-based application on AWS utilizing a Kubernetes cluster, ensuring scalability and high availability.
- Engineered a suite of reusable Angular UI components, enhancing development efficiency and consistency, and delivered new features in an Agile environment.
- Optimized frontend performance through targeted code refactoring, rigorous testing, and refined state management, resulting in a 15% reduction in average load times.
- Designed and implemented RESTful microservices for backend communication, ensuring seamless data exchange between services and the UI.
- Architected and deployed an end-to-end upstream application on serverless AWS infrastructure, streamlining data processing and reducing operational costs.

Consultant | Deloitte
01/2020 - 01/2021

- Architected and deployed a serverless application on AWS, leveraging Lambda, API Gateway, and S3 for scalable and cost-effective solutions.
- Developed a highly dynamic and client-configurable frontend UI, enabling seamless customization and improved user experience for diverse client needs.
- Engineered robust REST APIs using AWS Lambda and API Gateway, implementing comprehensive CloudWatch logging to facilitate efficient support and troubleshooting
- Drove full lifecycle ownership of the application, encompassing development, performance optimization, and automated deployment, resulting in a 20% reduction in deployment time.

Developer 1 | TransUnion
06/2018 - 01/2020

- Migration of a critical legacy application to a modern microservices-based web application deployed on on-premise infrastructure.
- Developed reusable UI components using Angular 4, implementing advanced concepts to enhance user experience and maintainability.
- Refactored complex legacy code into efficient RESTful APIs, improving performance and enabling seamless integration with the new microservices architecture.
- Leveraged Java, Spring, REST APIs, Spring Security, and JDBC templates to deliver robust and secure backend services.

Senior Software Engineer | Capgemini India
05/2016 - 06/2018

- Developed a high-performance, multithreaded batch processing application in Java 7, Autosys designed to handle and process millions of financial transactions efficiently.
- Leveraged JDBC templates for efficient database interactions, ensuring data integrity and optimizing transaction processing within the batch application.

Java - Trainee | Jspiders
05/2015 - 04/2016

- Completed comprehensive training at Jspiders in Spring and Hibernate, developing expertise in building robust and scalable enterprise applications.
- Gained in-depth knowledge of Spring and Hibernate at Jspiders, strengthening abilities to architect and build robust, scalable systems.
- Mastered Spring and Hibernate frameworks through intensive training at Jspiders, enabling the development of robust and scalable applications.
